

## Model 2092 15° Tilt Conveyor

*Shown with optional equipment*

### Standard Features

- AB PLC
- Emergency Stop and Reset Controls
- Hand Crank Width Adjust
- Inspect and Release Controls
- Adjustable Pneumatic Lift Assembly
- ESD Belts

### Application

The Model 2092 15° Tilt Conveyor is used to incline a board towards the operator by 15° for easier hand insertion or board inspection. The conveyor utilizes a pneumatic cylinder to gently raise and lower the conveyor section. The board can also be transferred in the tilted orientation.

The unit is available with or without workstation options, including overhead lights, part bins, footrests, and more.

Typical applications include:

- Hand insertion of components
- Initiate a 15° tilt for a downline section of fixed 15° conveyor workstations

### Available Options

- Dual “Tilt” switches for increased safety
- Power Width Control
- All workstation options are compatible
- CE compliance
- 3mm or 5mm edge guide
- 50” Lift Gate features 28” opening
- 60” Lift Gate features 38” opening
- Power Width Control
- CE compliance

We welcome custom applications.

### Additional Benefits

- Tilt feature improves ergonomics and reduces operator fatigue
- Modular design allows accessories to be added with simple hand tools
- Entire conveyor assembly raises, which improves repeatability by reducing flex
- Precision-cut, proprietary aluminum extrusion frame.
