Mat Top Conveyor Products  
From Simplimatic Automation

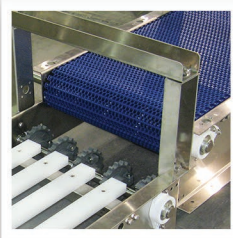

# Simplimatic® Mat Top Conveyor Systems

**Sanitary Mat Top Conveyor:** provides rugged bulk conveying capabilities and utilizes clean-in-place design to accommodate caustic wash down for a variety of sanitary applications.

**Painted Steel Mat Top Conveyor:** features durable carbon steel construction for bulk conveying in industries that do not require wash down. This mat top conveyor is extremely customizable.

**Stainless Beverage Conveyor:** delivers high-strength bulk conveying in applications that require occasional wash down, without the need to meet strict sanitation requirements.

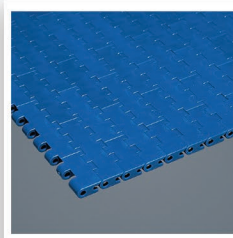

**Simpli-Mat® Aluminum Conveyor:** provides light-duty bulk handling, utilizing a modular aluminum conveyor design. This reconfigurable conveyor system is simple to integrate and can be easily upgraded.

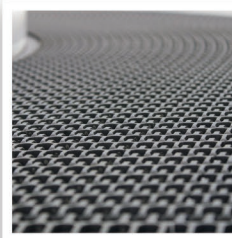

## Simplimatic provides reliable bulk conveying for nearly any industry.

Simplimatic's mat top conveyor is available in stainless steel, carbon steel, or modular aluminum construction to provide a conveying solution for nearly any bulk-handling application.

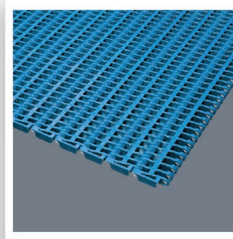

Compatible with Intralox®, Rexnord®, Habasit®, and Uni® mat top chains, Simplimatic's mat top conveyor is available in 6", 12", 18", 24", 30", and other custom belt widths. Custom chain options and frame materials make Simplimatic's mat top conveyor system the ideal choice for bulk conveying in nearly any industry.

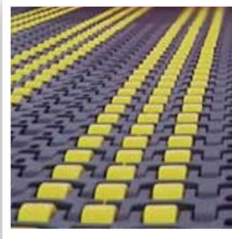

**Solid Top Mat Top Chain:** thick surface offers long service life and chains using <1" pitch for smooth operation with minimal chordal action, dead-plate gap, and speed pulsation.

**High Friction Mat Top Chain:** high-quality mat top chain with rubber-bonded top surface provides a friction top to prevent product slipping during conveyor incline and decline operations.

**Perforated Top Mat Top Chain:** the flexible chain module provides a high-friction surface for incline or decline conveying applications while not interfering with the chain passageway.

**Low Backpressure Mat Top Chain:** extremely flexible chain is constructed using durable roller chain to allow for the accumulation of product between manufacturing processes when necessary.

### The Simplimatic System Advantage

Simplimatic's mat top conveyor systems are a collection of high-quality conveyor components designed to reliably transport bulk goods between processes during bottling, packaging, assembly, and a wide range of other manufacturing tasks. Utilizing multiple frame types and chain styles, Simplimatic's mat top conveyor provides customers with the ability to select a bulk-material handling system that is perfectly engineered to solve a project's mass conveying needs.

### Simplimatic's Durable System Features and Components

Simplimatic conveyor systems are designed to provide customers with an easy-to-integrate mat top conveyor solution. Simplimatic's steel and aluminum versions of mat top conveyors feature:

- American-made design, construction, and support to ensure maximum reliability
- Standardized beams and brackets for ceiling-hung or floor-mounted installation
- Low-cost, high-performance modular product guide system for line flexibility
- Multiple chain varieties to provide a broad range of handling options
- Heavy-duty drive and idle assemblies for worry-free operation

### Simplimatic System Global Usage

Simplimatic Automation has been supplying customers around the globe with material handling solutions since 1965 and has successfully integrated Simplimatic's mat top conveyor in the following industries:

- Food and beverage conveying and packaging industry
- Pharmaceutical and prescription fulfillment industry
- Automotive component assembly industry
- Personal care product handling industry
- Packaged food products industry
- Electronics assembly industry
- and many other industries

### Simplimatic Global Lifetime Service & Support

Simplimatic has built the framework necessary to ensure lifetime spares, service, and support are available for all Simplimatic products installed around the globe.
