AUTOMATION

*Keep it smart. Keep it simple.*

## Spiral Conveyor

### **Offers Tighter Diameter, Long-Lasting Chain / Options Adjustability**

Simplimatic Automation's space-saving spiral conveyor is available at a diameter of just 36 inches. This innovative design allows continuous product flow while changing elevations and offers the convenience of smaller size with greater strength. The conveyor is equipped with corrosion-protected, long-lasting RexHiPro roller chains, eliminating the need for frequent part replacement.

### STANDARD FEATURES

*Extruded aluminum base frame*

*Mild steel with powder coat construction*

*Conveyor and base frame also available in stainless steel*

*Corrosion-protected RexHiPro roller chains*

*Customization through adjustable guides*

### BENEFITS

*Tighter diameter than our competitors (36.00")*

*Smaller footprint to fit into tight spaces*

*Easily adaptable for different products and industries*

*Offered in a wash-down application*

*High protection against mechanical and chemical impact*

### SPECIFICATIONS

*36" center line diameter – large diameters available if needed*

*12" pitch per 360-degree coil – standard*

*Available with smooth or grip top flight, depending on application*

*Elevator or lowerator styles*

*Corrosion resistance in a salt spray test at >600 h acc. to ISO 9227*

*Available in 4 discharge configurations: Inline, 90 degree, 180 degree, 270 degree*
